i got hyper in tension, So, we're sure it absolutely can help you pass Adobe AD0-E551 exam and get Adobe certificate and you don't need to spend much time and energy on preparing for AD0-E551 exam.

NEW QUESTION: 1

Had Einstein not been such a _____ mathematician, many of our engineering Accomplishments may have taken many years before even reaching the drawing board.

- A. prosaic
- B. prophetic
- C. prodigious
- D. superb
- E. qualified

Answer: C

Explanation:

Actually all of the answer choices lend themselves to this question. Remember SAT is looking for the best choice and Choice A, "prodigious" or extraordinary in degree, is the only choice actually rising to the occasion to praise such an accomplished mathematician.

NEW QUESTION: 2

Which of the following is a not a preventative control?

- A. Establish procedures for emergency changes.
- B. Deny programmer access to production data.
- C. Run a source comparison program between control and current source periodically.
- D. Require change requests to include information about dates, descriptions, cost analysis and anticipated effects.

Answer: C

Explanation:

Running the source comparison program between control and current source periodically allows detection, not prevention, of unauthorized changes in the production environment. Other options are preventive controls.

- D. The API response is encoded in XML
- E. The API call reads information from an object class

Answer: D,E

NEW QUESTION: 4

Refer to the exhibit.

The alias in the rule shown in the exhibit is network 10.1.1.0/24.

A wireless client is assigned IP address 10.1.2.10/24 and the "admins" role. The wireless client at 10.1.2.10 attempts to initiate a Web session with a server at 10.1.1.2. A wired client at 10.1.1.3 attempts to initiate an SSH session with the wireless client at 10.1.2.10.

How does the Aruba firewall handle these attempts?

- A. The firewall drops the traffic from the wireless client. The firewall drops the traffic from the wired client.
- B. The firewall permits the traffic from the wireless client and also permits the return traffic from the server. The firewall permits the traffic from the wired client and also permits the return traffic from the wireless client.
- C. The firewall permits the traffic from the wireless client and also permits the return traffic from the server. The firewall drops the traffic from the wired client.
- D. The firewall permits the traffic from the wireless client, but drops the return traffic from the server. The firewall drops the traffic from the wireless client.

Answer: B
