How to get a good job, You can choose your most desirable way to practice our C-TPLM30-67 preparation engine on the daily basis.

NEW QUESTION: 1

An architect was recently hired by a power utility to increase the security posture of the company's power generation and distribution sites. Upon review, the architect identifies legacy hardware with highly vulnerable and unsupported software

driving critical operations. These systems must exchange data with each other, be highly synchronized, and pull from the Internet time sources. Which of the following architectural decisions would BEST reduce the likelihood of a successful attack without harming operational capability? (Choose two.)

- A. Employ own stratum-0 and stratum-1 NTP servers
- B. Isolate the systems on their own network
- C. Upgrade the software on critical systems
- D. Install a firewall and IDS between systems and the LAN
- E. Configure the systems to use government-hosted NTP servers

Answer: D,E

NEW QUESTION: 2

You have an Azure subscription that is used by four departments in your company. The subscription contains 10 resource groups. Each department uses resources in several resource groups. You need to send a report to the finance department. The report must detail the costs for each department. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Box 1: Assign a tag to each resource.

You apply tags to your Azure resources giving metadata to logically organize them into a taxonomy. After you apply tags, you can retrieve all the resources in your subscription with that tag name and value. Each resource or resource group can have a maximum of 15 tag name/value pairs. Tags applied to the resource group are not inherited by the resources in that resource group.

Box 2: From the Cost analysis blade, filter the view by tag. After you get your services running, regularly check how much they're costing you. You can see the current spend and burn rate in Azure portal.

* Visit the Subscriptions blade in Azure portal and select a subscription.

* You should see the cost breakdown and burn rate in the popup blade.

* Click Cost analysis in the list to the left to see the cost breakdown by resource. Wait 24 hours after you add a service for the data to populate.

* You can filter by different properties like tags, resource group, and timespan. Click Apply to confirm the filters and Download if you want to export the view to a Comma-Separated Values (.csv) file.

Box 3: Download the usage report

NEW QUESTION: 3

The marketing department has decided that a call-to-action button currently in the site footer should be moved to the sidebar for higher visibility. The button is currently implemented in a custom block.

How should you make the requested changes?

- A.** For each content type, use the Layout Builder module's "manage layout" feature to reassign the block from the Footer region to the Sidebar region.
- B.** From the block layout admin page, drag the existing block from the Footer region to the Sidebar region.
- C.** From the "Appearance" admin page, reconfigure the site's theme to place the block in the Sidebar region instead of the Footer.
- D.** Using the "Basic page" content type's "Manage display" interface, drag the existing block from the Footer region to the Sidebar region.

Answer: D

NEW QUESTION: 4

Which clause should be included in an ALTER TABLE statement to update a table definition with a new column?

- A.** ALTER COLUMN
- B.** ADD COLUMN
- C.** RENAME COLUMN
- D.** APPEND COLUMN

Answer: B
