**NEW QUESTION: 1**

In which of the following phases of system development life cycle (SDLC) is contingency planning most important?

- A. Implementation
- B. Operation/maintenance
- C. Initiation
- D. Development/acquisition

**Answer: C**

Explanation:

Contingency planning requirements should be considered at every phase of SDLC, but most importantly when a new IT system is being conceived. In the initiation phase, system requirements are identified and matched to their related operational processes, allowing determination of the system's appropriate recovery priority.
