Answer: C
Explanation:
Explanation
The Security Center blade from the Azure portal includes the
'regulatory compliance dashboard'.
The regulatory compliance dashboard provides insight into your
compliance posture for a set of supported standards and
regulations, based on continuous assessments of your Azure
environment.
In the Azure Security Center regulatory compliance blade, you
can get an overview of key portions of your compliance posture
with respect to a set of supported standards. Currently
supported standards are Azure CIS, PCI DSS 3.2, ISO 27001, and
SOC TSP.
In the dashboard, you will find your overall compliance score,
and the number of passing versus failing assessments with each
standard. You can now focus your attention on the gaps in
compliance for a standard or regulation that is important to
you.
